

# LESSON PLAN

**DEPARTMENT OF MECHANICAL ENGINEERING, ITT, CHOUDWAR**

**SUBJECT: FLUID MECHANICS**

**Periods: 4 per week**

**NAME OF FACULTY: SRIKANTA KUMAR PANIGRAHI, LECTURER(MECH)**

**No. of weeks: 15**

Week	Class Day	Theory / Practical Topics
1 <sup>st</sup>	1 <sup>st</sup>	<b>Properties of Fluid</b> Define fluid, Description of fluid properties like Density, Specific weight, specific gravity, specific volume
	2 <sup>nd</sup>	Solving simple problems
	3 <sup>rd</sup>	Definitions and Units of Dynamic viscosity, kinematic viscosity
	4 <sup>th</sup>	Newton's law of Viscosity, Types of Fluids
2 <sup>nd</sup>	1 <sup>st</sup>	Surface tension
	2 <sup>nd</sup>	Deriving S.T. for liquid droplet, hollow bubble and jet
	3 <sup>rd</sup>	Capillary phenomenon
	4 <sup>th</sup>	Deriving capillary rise and capillary depression
3 <sup>rd</sup>	1 <sup>st</sup>	<b>Fluid Pressure and its measurements</b> Definitions and units of fluid pressure, pressure intensity and pressure head.
	2 <sup>nd</sup>	Statement of Pascal's Law and its derivation
	3 <sup>rd</sup>	Solving problems on pressure, pressure head and conversion of units
	4 <sup>th</sup>	Concept of atmospheric pressure, gauge pressure, vacuum pressure and absolute pressure and their graphical representation
4 <sup>th</sup>	1 <sup>st</sup>	Pressure measuring instruments, Piezometer, Simple U-tube manometer
	2 <sup>nd</sup>	Differential U-tube manometer and solving problems on it
	3 <sup>rd</sup>	Inverted Differential U-tube manometer and solving problems on it
	4 <sup>th</sup>	Bourdon tube pressure gauge
5 <sup>th</sup>	1 <sup>st</sup>	<b>Hydrostatics</b> Definition of hydrostatic pressure, Total pressure and centre of pressure
	2 <sup>nd</sup>	Derivation of Total pressure and centre of pressure on immersed bodies of Vertical flat plate
	3 <sup>rd</sup>	Solving Simple problems on immersed vertical rectangular, circular and triangular flat plates.
	4 <sup>th</sup>	Solving Simple problems on immersed horizontal rectangular, circular and triangular flat plates.
6 <sup>th</sup>	1 <sup>st</sup>	Archimedes principle, concept of buoyancy, Center of Buoyancy
	2 <sup>nd</sup>	Solving problems on buoyancy and center of Buoyancy
	3 <sup>rd</sup>	Meta center and meta centric height
	4 <sup>th</sup>	Concept of floatation
7 <sup>th</sup>	1 <sup>st</sup>	<b>Kinematics of Flow:</b> Types of fluid flow: Steady & unsteady flow, Uniform & Non-uniform flow, Laminar & Turbulent flow, Compressible & Incompressible flow
	2 <sup>nd</sup>	Continuity equation(Statement and proof for one dimensional flow)
	3 <sup>rd</sup>	Solving problems on Continuity equation
	4 <sup>th</sup>	Bernoulli's theorem (Statement and proof)
8 <sup>th</sup>	1 <sup>st</sup>	Solving problems on Bernoulli's theorem (Statement and proof)
	2 <sup>nd</sup>	Applications of Bernoulli's theorem (Venturimeter, pitot tube)
	3 <sup>rd</sup>	Solving simple problems on Bernoulli's theorem
	4 <sup>th</sup>	Limitations of Bernoulli's theorem
9 <sup>th</sup>	1 <sup>st</sup>	<b>Orifices, notches &amp; weirs</b> Define orifice, Flow through orifice
	2 <sup>nd</sup>	Orifices coefficient & the relation between the orifice coefficients

	3 <sup>rd</sup>	Classifications of notches & weirs
	4 <sup>th</sup>	Discharge over a rectangular notch or weir
10 <sup>th</sup>	1 <sup>st</sup>	Solving problems on rectangular notch or weir
	2 <sup>nd</sup>	Discharge over a triangular notch or weir
	3 <sup>rd</sup>	Solving problems on triangular notch or weir
	4 <sup>th</sup>	Solving problems on triangular notch or weir
11 <sup>th</sup>	1 <sup>st</sup>	<b>Flow through pipe:</b> Definition of pipe, Classification of losses of energy in pipe (Major & Minor losses)
	2 <sup>nd</sup>	Head loss due to friction: Darcy's and Chezy's formula (Expression only)
	3 <sup>rd</sup>	Solving Problems using Darcy's and Chezy's formula.
	4 <sup>th</sup>	Solving Problems using Darcy's and Chezy's formula.
12 <sup>th</sup>	1 <sup>st</sup>	Minor energy losses types and its formulae
	2 <sup>nd</sup>	Solving Problems on it
	3 <sup>rd</sup>	Solving Problems on it
	4 <sup>th</sup>	Hydraulic gradient line (H.G.L) and Total Energy line(T.E.L) definition and its value with graphical representation
13 <sup>th</sup>	1 <sup>st</sup>	Solving Problems on H.G.L & T.E.L
	2 <sup>nd</sup>	Solving Problems on H.G.L & T.E.L
	3 <sup>rd</sup>	<b>Impact of jets:</b> Impact of jet on fixed vertical flat plate
	4 <sup>th</sup>	Impact of jet on moving vertical flat plates
14 <sup>th</sup>	1 <sup>st</sup>	Solving problems on flat plates
	2 <sup>nd</sup>	Derivation of work done on series of vanes and condition for maximum efficiency.
	3 <sup>rd</sup>	Impact of jet on fixed curved vanes
	4 <sup>th</sup>	Impact of jet on moving curved vanes, its illustration using velocity triangles
15 <sup>th</sup>	1 <sup>st</sup>	Derivation of work done, efficiency of series of moving curved vanes
	2 <sup>nd</sup>	Solving problems on curved vanes
	3 <sup>rd</sup>	Solving problems on curved vanes
	4 <sup>th</sup>	Remedial class
		Remedial class
		Remedial class
